

Oslo

Corona vaccine

The vaccine is given in two doses over a period of a few weeks.
The vaccine will have its full effect one week after the second dose.
All vaccines can have side effects. Most are mild and short-lasting, and can occur 1-3 days after being vaccinated.

Known side effects

- ▶ Pain where the injection was given
- ▶ Tiredness, headache, muscle-pain, shivering, painful joints, high temperature

Everyone must wait at least 20 minutes after getting the vaccine

You must keep following the infection prevention regulations even though you have been vaccinated.

Your health journal at helsenorge.no will be updated.
